INTRODUCTION

Introduction

Community Health Statistics

The Community Health Statistics unit was created to provide a means of sharing information about the health behaviors, diseases, injuries, and demographic characteristics of specific populations in San Diego County. This unit aims to supply health professionals with community level data describing the health trends and needs of the residents of our County. Community Health Statistics also provides or refers persons to available local, state and national statistics.

Purpose

This profile is a compilation of information made available to the public health community and public policy-makers to better understand and manage the health and well-being of the residents of our County.

The purpose of this profile is to provide detailed information about the health and characteristics of the people living in San Diego County. It is designed to help the Health and Human Services Agency staff in each of the Health and Human Services Regions (Regions) identify problems and priority areas within their communities.

Regional Data

In an effort to provide more community level detail, profiles have been developed within each region by SRA. As described below, regional boundaries do not exactly match SRA boundaries, but can be estimated by an aggregation of SRAs. For this regional level community profile, the SRAs that most closely approximate the region were aggregated to provide regional estimates. A table and map is included at the beginning of the SRA section to describe the zip codes used to estimate the SRAs within this region.

Maps and data tables are presented by region, subregional area (SRA) and for the entire County. Regions are aggregations of zip codes as defined by the United States Postal Services. Zip codes designate geographic delivery areas, and may change over time with shifts in the population. SRAs are aggregations of census tracts based on community boundaries. Census tracts are small, relatively permanent statistical subdivisions of a county. Census tract boundaries are defined with the intention of being maintained over time so that statistical comparisons can be made from census to census.

DATA GUIDE

Data Sources

Health and demographic data are available from a variety of sources, represented by three different categories of data. Population data, such as the census, is collected from the entire population. Sample or survey data are collected from a portion of the population, and extrapolated to represent the entire population. Administrative data are collected based on an organization's day-to-day operations, such as the prehospital database. The following data sources were used in the preparation of this report.

American Community Survey (ACS): ACS is a new nationwide survey designed to provide communities a fresh look at how they are changing. It is intended to eliminate the need for the long form in the 2010 Census. The ACS collects information from U.S. households similar to what was collected on the Census 2000 long form, such as income, commute time to work, home value, veteran status, and other important data. Information is available by county.

California Health Interview Survey (CHIS): CHIS is an important source of information on health and access to health care services. CHIS is a telephone survey of adults, adolescents, and children from all parts of the state. The survey is conducted every two years. CHIS is the largest state health survey and one of the largest health surveys in the United States. The survey provides state and county level information for health planning and comparison. Region level information will be available in 2007. A list of CHIS questionnaire topics is included. To see the actual survey questions, go to <http://www.chis.ucla.edu/topics.html>.

Emergency Department Data (ED Data): ED data is collected and maintained for most emergency hospitals in San Diego County. ED data elements include patient's home zip code, demographic information, source of payment, disposition, diagnoses and procedures performed for all patients treated and discharged from the ED.

Emergency Department Data (OSHPD): Summary ED data is collected and maintained for all emergency hospitals in San Diego County. ED data elements include gender, race/ethnicity, source of payment, and disposition for all patients treated and discharged from the ED.

HIV/AIDS Reporting System (HARS): HARS is used to report HIV and AIDS cases in San Diego County. HIV reporting began recently (July 2002), has not been evaluated and therefore is not available for zip code level analysis. The number of AIDS cases is available by zip code if the total is 5 or more.

Hospital Discharge Data: Discharge data is collected and maintained for most inpatient facilities in San Diego County. Discharge data elements include patient's home zip code, demographic information, source of payment, disposition, diagnoses and procedures performed for all patients admitted to the hospital for any condition.

Medical Examiner's Data: EMS receives an Investigative Summary and Autopsy for every individual who dies in San Diego County from a traumatic injury. Medical Examiner's Records contain injury related information including date and time of injury, incident location, patient home zip code, external cause of injury (ICD9 CM E code), age, sex, race/ethnicity, vehicle make and type, law enforcement agency and report number, mechanism of injury and detailed narrative of injuries sustained.

Prehospital Database: EMS receives a prehospital patient record (PPR) for every patient seen by a paramedic or emergency medical technician. The PPR contains information including demographics, incident zip code location, chief complaint, patient status, injury event information, restraint use, contributing factors, times and outcomes.

San Diego Association of Governments (SANDAG): SANDAG creates and maintains a tremendous quantity of demographic, economic, land use, transportation and criminal justice information about the San Diego region. Demographic data includes population characteristics like age, education, and employment. SANDAG develops annual demographic estimates and long range forecasts in addition to maintaining census data files. Data is available by County, SRA, zip code, and census tract.

Sexual Assault Response Team (SART): SART data is collected for every sexual assault victim who presents to authorities or appropriate facilities. This database does not represent all sexual assaults occurring in San Diego, only those that are reported. Data is collected on the incident, and aggregate information is available at the county level.

STD Morbidity Surveillance Data: Data is available for three STDs: Chlamydia, gonorrhea and syphilis (primary and secondary). Information on age, gender, race/ethnicity are available for all 3 diseases. Data is also available at the zip code level, although this data is incomplete.

Statewide Integrated Traffic Record System (SWITRS): SWITRS is traffic collision data collected by the California Highway Patrol. Detailed information on the circumstances of the crash, drivers, passengers, and other victims are available by incident zip code.

Trauma Registry: EMS receives a Trauma Registry for every trauma patient admitted to any of the designated trauma center hospitals who meets one or more of the following criteria: length of hospitalization of 24 hours or more, death due to traumatic injuries, or transfer to or from another acute care hospital.

Vital Records Data: A death certificate is completed for every person who dies in San Diego County. Vital records data includes information on underlying and contributing causes of death and basic demographic information by zip code.

For more information on this publication, please contact Leslie Upledger Ray at the Community Health Statistics Unit, 6255 Mission Gorge Road, San Diego, CA 92120; (619) 285-6429.

GLOSSARY OF INDICATOR TERMS

GLOSSARY OF TERMS BY TABLE

The following terms are defined by SANDAG.

Demographic Profile

Total Population: Total number of persons (residents) in an area.

Age Distribution: Total number of persons (residents) in an area by age group.

Median Age: Divides the age distribution into two equal parts; half of all persons are older than the median and half are younger.

Gender Distribution: Total number of persons (residents) in an area by gender.

Race/Ethnicity: Self identification by people according to the race(s) and ethnicity with which they most closely identify.

Education

Completed Education: The highest level of education completed in terms of the highest degree or the highest level of schooling completed.

Household Income

Household: A person or group of people living in a housing unit that serves as a primary place of residence.

Household Income: Total pre-tax annual income of all members of a household.

Income: Sum of wages, salary, commissions, bonuses, tips, self-employment income, interest, dividends, net rental income, royalty income, income from estates and trusts, Social Security or Railroad Retirement income, Supplemental Security Income (SSI), any public assistance or welfare payments from the state or local welfare office, retirement, survivor, or disability pensions, and any other sources of income received regularly.

Median Household Income: Divides the household income distribution into two equal parts; half of all households have incomes above the median and half have incomes below the median.

Persons per Household: The average number of persons living in a housing unit, calculated by dividing the household population by the number of occupied housing units.

Income per Person in HH: The average income per person living in a housing unit, calculated by dividing the Median Household Income by the Persons per Household.

Change from County: The percentage above or below the County of San Diego average of \$18,707 per person (2004 estimate).

Housing

Owner Occupied: Housing units that are occupied as a primary residence by the owner of the unit.

Renter Occupied: Housing units that are occupied as a primary residence by an individual other than the owner of the unit.

Residential Density: The total number of housing units per developed residential acre.

Language

Primary Language Spoken at Home: The language currently used at home, either “English only” or a non-English language which is used in addition to English (bilingual) or in place of English.

Occupation

Employed Civilians 16+ Years: Civilians 16 years old and over who are either “at work” or “with a job but not at work.” Excludes people of active duty in the United States Armed Forces.

Personal Vehicles

Vehicle Availability: Passenger cars, vans, and pickup or panel trucks of 1-ton capacity or less kept at home and available for use by household members. Excludes vehicles kept at home but used only for business purposes.

Poverty

Population: Families or individuals whose total income falls below the poverty threshold set by the Census Bureau, according to family size and composition.

Family: Householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption.

Income Percent of Poverty Level: The percentage of the poverty threshold that the family’s household income is at.

School Enrollment

Percent Enrolled: The percentage of children ages 4 to 18 years who were enrolled in grades K –12. Found by dividing the number of enrolled students (K-12) by the total population ages 4 to 18 years.

Percent Public: The percentage of all students enrolled in grades K – 12 who attend a private school. A private school is one that is supported and controlled primarily by religious organizations or other private groups.

Percent Private: The percentage of all students enrolled in grades K – 12 who attend a public school. A public school is one that is supported and controlled primarily by a federal, state, or local government (including tribal schools).

Single Parent Homes

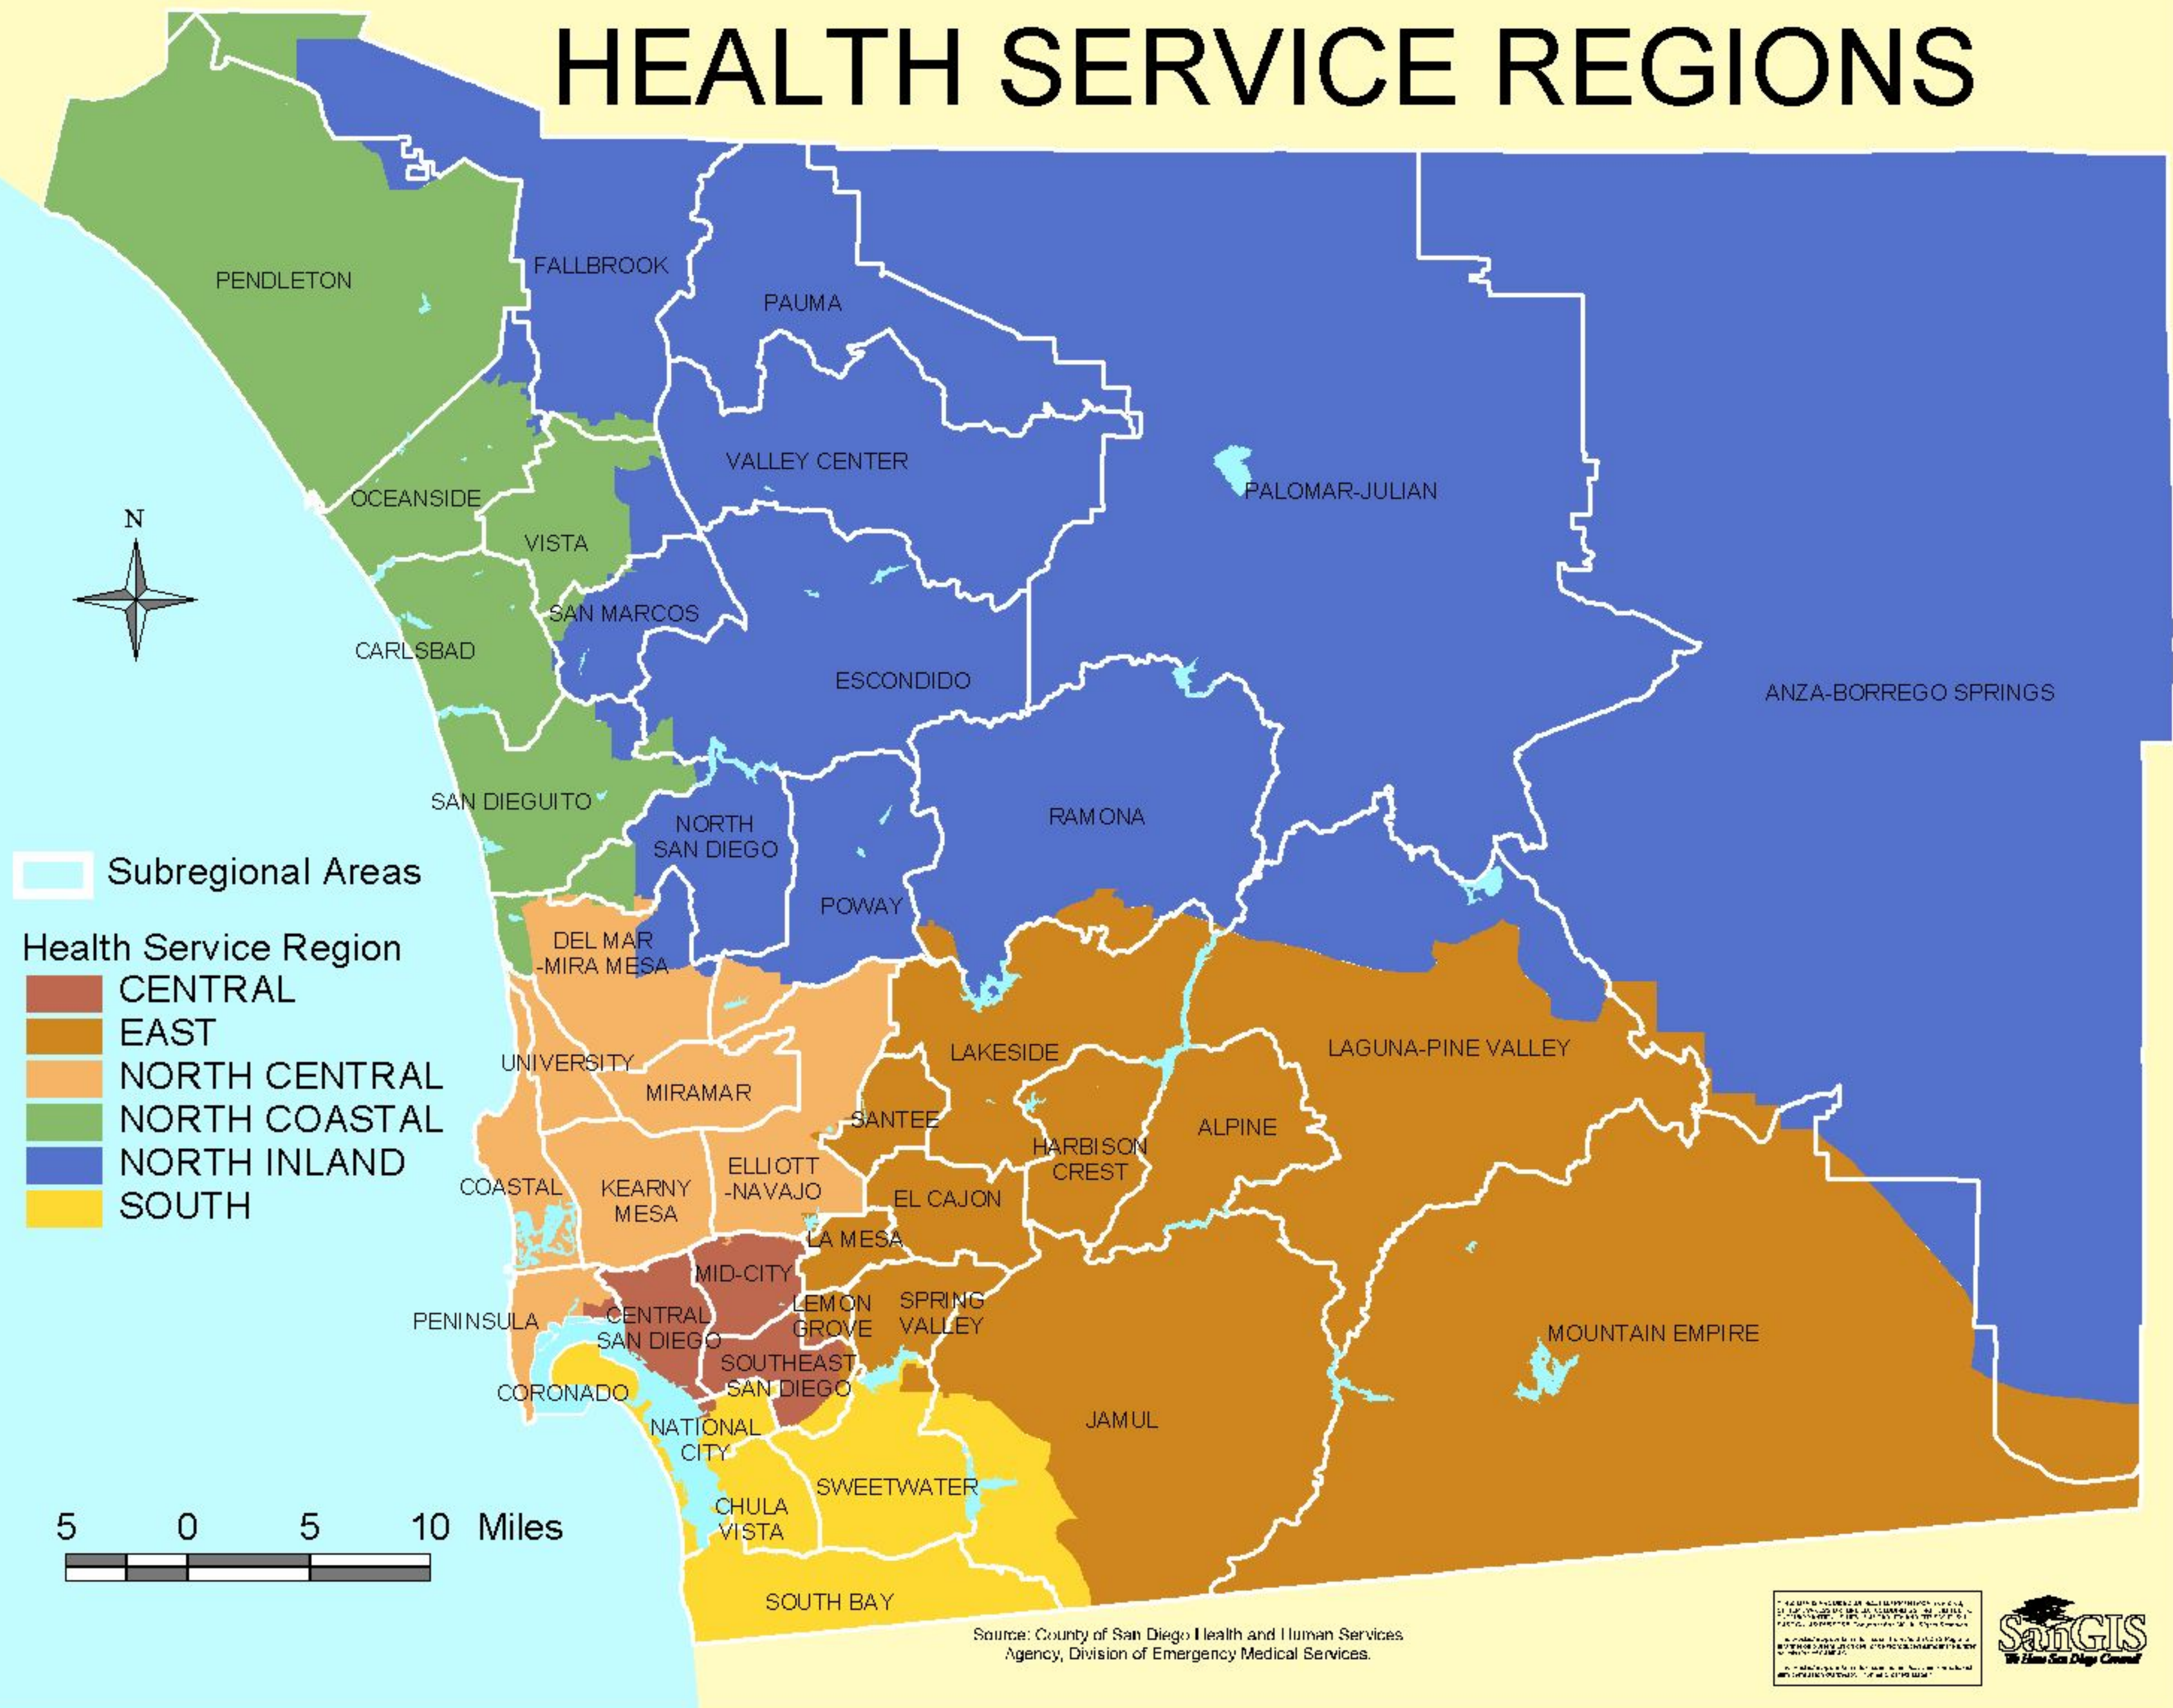

Single Parent Household: The percentage of all families with "own children" under age 18 living in the household, who are headed by a person, male or female, without a spouse present in the home. "Own children" are never-married children under 18 who are related to the householder by birth, marriage, or adoption

Unemployment

Unemployed: Percentage of civilians 16 years old and over who are neither “at work” or “with a job but not at work” during the reference period, and were actively looking for work during the last four weeks and were available to accept a job.

	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Number of Reported Elevated Blood Lead Levels, Ages 0-6	14	25.0	15	21.7	6	15.0	14	28.0

All rates are per 100,000 population. Breast and cervical cancer deaths are per 100,000 female population.

Percent refers to percentage of all reported cases in San Diego County.

Suicide and Homicide Public Health Indicators

	2000		2001		2002		2003	
	Number	Rate	Number	Rate	Number	Rate	Number	Rate
Suicides, Age 55+	16	17.1	15	15.5	17	17.1	-	-
Suicides, Age 15-24	6	7.7	7	9.2	7	8.2	-	-
Homicides, Ages 15-34	5	3.2	7	4.6	8	5.5	-	-

All rates are per 100,000 population within each age group.

Public Health Indicators Related to Births

	2000		2001		2002		2003	
	Number	Rate	Number	Rate	Number	Rate	Number	Rate
Infant Mortality	40	5.3	39	5.2	30	4.0	-	-
Teen Birth Rate, Ages 15-17	202	22.9	183	20.1	170	17.9	187	19.1
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Number of All Live Births & Percent of County Total	7,615	17.2	7,456	17.0	7,582	17.3	7,645	16.9
Number & Percent of Live Births Where Mother Received Late or No Prenatal Care	317	4.4	202	2.9	184	2.5	224	3.0
Number & Percent of Live Births with Low Birth Weight - Under 2500 grams	439	5.8	435	5.8	459	6.1	441	5.8

Infant Mortality Rate: Deaths <1 year per 1,000 live births.

Teen Birth Rate: Births per 1,000 population, Ages 15-17 years

Source: County of San Diego, Health and Human Services Agency, Community Health Statistics Unit, Trends in Selected Public Health Indicators, March 2005

Note: Prehospital data is collected in fiscal years. For each prehospital indicator, 2000 refers to FY1999/2000, and 2001 refers to FY2000/2001.
